Lab1.2 

Open in Map Viewer Classic

Laure A Briol
briol009_UMN

The screenshot displays the ArcGIS Map Viewer Classic interface. On the left, a dark sidebar contains navigation options: Add, Layers, Tables, Basemap, More, Save and open, Map properties, Share map, More, Information, and Collapse. The top layer list shows 'GeoJSON' with an 'Add' button. The main map area shows a street map of Minneapolis and St. Paul, with an orange triangle overlay. The right panel is open to the 'GeoJSON' layer, showing the 'Information' tab with the layer name 'GeoJSON'. The 'Symbology' tab is also visible, showing a color swatch for the layer. The 'Appearance' tab is partially visible at the bottom.
